Research Institute of Mathematics, Seoul National University Mar 2025 – Present
 Postdoctoral Supervisor: Prof. Cheol-hyun Cho
 – Research on periodic orbits in the three-body problem via symplectic geometry.

Graduate Student Researcher

Department of Mathematics, Seoul National University Mar 2018 – Feb 2025
 Ph.D Advisor: Prof. Otto van Koert
 – Focus on global hypersurfaces of section and the three-body problem in symplectic and contact geometry.

Manuscripts and Publications

- Fiberwise Convexity of Restricted Three-body Problem** (Manuscript)
 with Sunghae Cho and Beomjun Sohn In preparation
 – Investigating fiberwise convexity in the restricted three-body problem, relating it to spatial periodic orbits.
- Global Hypersurfaces of Section and the Spatial Kepler Problem**
 Advisor: Prof. Otto van Koert Ph.D. Thesis, Dec 2024
 – Demonstrated existence of global hypersurfaces of section for certain Hamiltonian systems.
 – Provided simplified descriptions of the moduli space of periodic orbits in the rotating Kepler problem and computed Conley-Zehnder indices.
- Global Hypersurfaces of Section for Geodesic Flows on Convex Hypersurfaces**
 with Sunghae Cho *Archiv der Mathematik*, 31 Jul 2024
 – Constructed a global hypersurface of section for geodesic flows on convex hypersurfaces with isometric involution, generalizing Birkhoff annuli to higher dimensions.
